Comprehensive Guide to 2fa code binance

On Oct. 13, Bloomberg reported that China Renaissance Holdings Ltd., an investment bank based in Beijing, was in talks to raise about \$600 million to form a digital-asset treasury (DAT) in the US to accumulate BNB.

But the offering, called Ondo Global Finance, is only available for non-U.S. investors, according to an announcement from the company.

Analyst Jelle said that Ether is just retesting a key breakout level around \$4,000 before resuming its uptrend.

That cohort may be partly accounting for crypto's weekly decline, with Bitcoin dropping over 9%, Ethereum falling 6%, and XRP showing a 15% dive—with some altcoins down even worse. Crypto prices plunged last Friday following President Trump's latest China tariffs threat, prompting a record \$19 billion worth of daily liquidations, and have ticked down further this week.

With Bitcoin setting a then-record price of \$67,000 in November 2021 before declining in the months thereafter, that should mean that the cycle is soon coming to an end. And some traders may be betting on that outcome.

Surprisingly, the company added that retail long positioning is inversely correlated with price, at -0.86 for ETH, implying that as retail longs reach extreme highs, the likelihood of a reversal grows.
