Paradigm first announced plans for the payments-focused blockchain network in September, citing a “growing need for optimized infrastructure” that scales for global payments.

The company expects to raise about \$230.8 million, payable in Bitcoin or SolvBTC, with the transaction scheduled to close on Friday, pending customary conditions.

Meanwhile, Michael Saylor hinted on Sunday that Strategy may buy more Bitcoin after sharing a chart showing \$69 billion in BTC holdings. Even with equity pullbacks, DAT crypto reserves remain intact, signaling long-term conviction.

Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.
