The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.
