But the offering, called Ondo Global Finance, is only available for non-U.S. investors, according to an announcement from the company.

Grayscale has played a central role in the institutionalization of crypto. Founded in 2013, it has grown into one of the world's largest digital asset investment platforms, managing over \$35 billion in assets. It has now launched staking-enabled products that bring blockchain yield mechanics into Wall Street's traditional framework.

The character, developed by comedian and technologist Eline Van der Velden—who spun off Xicoia from her production company Particle6—was unveiled last week at the Zurich Summit during the Zurich Film Festival in Switzerland, and immediately drew online attention. Van der Velden said multiple talent agents are already interested in signing the artificial personality.

Through the years, Musk has posted tweets, changed logos and made playful remarks that led to DOGE price pumps.

“This redistribution is quite unique,” he said. “We’ve already seen three such periods—summer 2024, fall 2024, and summer 2025. In previous cycles, this usually happened only once.”

This rush to buy protection is noticeably changing the market and has caused the price of bearish bets to become more expensive than bullish ones, Melville explained. This trend, which started with Bitcoin, has now extended to Ethereum, indicating that Ethereum investors are becoming increasingly cautious.
