Even with co-signing meant to curb censorship, the model still assumes enough liquidators (and sometimes large lenders) behave correctly. Even if they cannot steal Bitcoin thanks to the system's design, this introduces a trust assumption into the system.

VC participation remains necessary to bring the “progressive decentralization” needed to achieve a “secure global information infrastructure,” explained Lubin.

Miners typically rely on the price of Bitcoin to go up to cover costs but continued volatility for the asset has spurred, some large miners to branch into high-powered

computing.

High-end brands are also joining in: Gucci and Ralph Lauren have continued to expand their crypto payment options at select flagship stores, particularly for their more exclusive collections.

The introduction of Google's AI summaries has raised huge red flags for web publishers, however, as users are less likely to visit their sites if the information is extracted and provided up front. The issue is compounded by AI's tendency to hallucinate, and even provide dangerous answers based on flawed sources.

The difference between the crypto trading performance of the AI models likely stems from their training data, according to Nicolai Sondergaard, research analyst at crypto intelligence platform Nansen.
