Comprehensive Guide to binance cyber attack

Strategy, Metaplanet stock sinks

Metaplanet shares (MTPLF) lost 6.5% on the Tokyo Stock Exchange yesterday in a fall to 402 yen (\$2.67) and have tanked 79% since their mid-June peak of 1,895 yen (\$12.58).

The researchers used Metaplanet, the fourth-largest Bitcoin treasury firm, as an example, as the company effectively transformed a market capitalization of \$8 billion, supported by just \$1 billion in Bitcoin holdings, into a \$3.1 billion market cap backed by \$3.3 billion in BTC.

That cohort may be partly accounting for crypto's weekly decline, with Bitcoin dropping over 9%, Ethereum falling 6%, and XRP showing a 15% dive—with some altcoins down even worse. Crypto prices plunged last Friday following President Trump's latest China tariffs threat, prompting a record \$19 billion worth of daily liquidations, and have ticked down further this week.

People have always looked to frontiers for freedom. That is because societies are, fundamentally, structures that organize violence to contain the desires of individuals in favor of the priorities of those in power. Generally, this has at least some pro-social qualities: Police have a privileged role as monopolists of violence so that we can buy deodorant at Walgreens without ringing a bell for an attendant. But that does not change what it is.

Bitcoin was recently trading at \$111,285, according to cryptocurrency markets data provider CoinGecko, after rising 2% over the past 24 hours. BTC is down more than 10% after reaching an all-time high of \$124,285 last month.
