Comprehensive Guide to binance dex us customers

FalconX said Wednesday it agreed to acquire Swiss crypto exchange-traded product issuer 21Shares, bringing one of the sector's largest asset managers under its institutional brokerage platform.

It also mentioned that A7A5 — a sanctioned ruble-pegged stablecoin issued in Kyrgyzstan — is a major example of this trend as it facilitates cross-border payments for both institutional and business users.

Without real demand, any breakout attempt might lack the strength required to push ETH above key levels.

Ether derivatives data showed moderate unease among bullish traders, but whale positioning suggested most were not expecting a deeper decline. The key question was whether the \$3,700 support would hold as macroeconomic risks intensify.

The licensing agreements arrive as prediction markets hit record-breaking growth, with weekly trading volume climbing past \$2 billion for the first time.

The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.
