This article discusses what crypto staking is, what has prevented greater institutional participation and how Grayscale has encouraged the institutionalization of crypto investment. It also highlights regulatory and market changes surrounding staking and explains how Grayscale's spot crypto ETPs deliver staking yields to investors. Finally, it outlines the risks associated with staking funds and shows how Grayscale's ETPs have shifted crypto from a price-tracking asset to an income-generating one.

They won't prioritize privacy features that could raise regulatory eyebrows, and they can't move as fast in shipping novel DeFi primitives, as every new feature

needs legal sign-off. They'll always have to balance decentralization with shareholder value.

A weakening U.S. dollar, rising governance risks, and yield curve steepening are creating a bullish narrative for Bitcoin, according to a Thursday investment note from Singapore-based QCP Capital.
