Corporations will back off if user take-up is low

While AI tools can help spot market trend shifts for day traders via social media and technical signals, traders still can't rely on them for autonomous trading.

The comments follow Babylon's release of a white paper in early August, outlining what it calls a Bitcoin trustless vault system. The system leverages the Bitcoin smart contract verification system BitVM3 to lock BTC in per-user vaults, where withdrawals (redemption or liquidation) are gated by cryptographic proofs of external smart contract state verified on Bitcoin.
