Two-step rule: Wait for the retest. If the “broken” level is reclaimed and held with improving participation (volume or depth), it was likely a trap. If not, you’ve avoided chasing noise.

The US dollar’s hegemony is over, as evidenced by China’s recent announcement of export controls on rare earth minerals, a critical component in electronics manufacturing and military defense applications, according to analyst Luke Gromen.

Miners typically rely on the price of Bitcoin to go up to cover costs but continued volatility for the asset has spurred some large miners to branch into high-powered

computing.

However, as the price failed to hold above \$110,000 on Thursday, that short-term confidence faded. While the hourly premium has turned negative, the daily reading remained slightly positive, indicating that long-term US buying support hasn't fully disappeared, but it is currently under strain.

Meanwhile, South Korea's National Tax Service (NTS) has also intensified its crackdown on crypto tax evasion, warning that even assets stored in cold wallets will be seized if linked to unpaid taxes.

Blockchain technology is rapidly developing worldwide, becoming an important driving force for digital transformation. As a distributed ledger technology, blockchain ensures data security and immutability through decentralized means. In the financial sector, blockchain technology has begun to transform traditional payment, clearing, and settlement processes, improving efficiency and reducing costs. At the same time, blockchain has shown tremendous application potential in various fields such as supply chain management, healthcare, and public services. With the continuous maturity of technology, we have reason to believe that blockchain will lay a solid foundation for the future digital economy.
