Federico Fabiano, Head of Legal & Compliance at Hex Trust, told Decrypt that "the era of 'check-the-box' compliance needs to evolve," saying that reliance on existing laws may no longer be tenable.

Prosecutors also revealed that the U.S. government has seized more than \$14 billion worth of BTC from Prince Holding, and is currently pursuing the largest forfeiture action in DOJ history.

In addition to maintaining a focus on short-term maturities, most central banks worldwide have already begun easing or are anticipating further easing, thereby

keeping the front-end anchored.

Catching a coin's name trending on X or in a Telegram chat isn't enough to justify putting capital at risk. Social buzz moves fast, and most spikes fade before price action catches up, or worse, they might be the result of coordinated shilling. That's why the next step is to turn raw noise into structured signals you can actually rank and compare.

Also, the candlesticks have started to show signs of extreme FOMO. A parabolic chart is already hyperbullish, but a parabolic chart in which the bodies of the latest candlesticks are moving faster than the support, is probably too good to be true. Common sense says there must be a correction for markets to find some balance.

The milestone is expected to redefine the protocol's economic and technical architecture, introducing a modular "hub and spoke" design.
