This week, Citi gave Strategy a "buy" rating with a \$485 price target but warned the stock "presents significant risks due to its positioning as a leveraged proxy for Bitcoin," noting even moderate Bitcoin price declines can lead to magnified shareholder losses.

Hash computations—or hashing—is the process of turning data into a fixed-length string of characters. It's needed to do things on the Bitcoin network, like creating private keys so users can make transactions.

Despite the short-term uncertainty over capital rotation, the overall market sentiment remains positive. “It is a very good time for the markets, and is likely going to remain that way for the short-term foreseeable future,” Le Shi, managing director at algorithmic trading and market-making firm Auros, told Decrypt in an interview during Token2049 in Singapore last week.

The ACI said the program builds on the success of other buyback initiatives. In April, Aave soared by 13% as the community approved a \$4 million token buyback.

It is not clear which incidents were formally organized by the group and which are the result of other people jumping on the bandwagon.
