Back in February, Kaspersky had warned that malware was being distributed through GitHub repositories widely used by coders. If downloaded, it could hijack the victim's keyboard and replace wallet addresses with ones controlled by the attackers.

The competition began with \$200 in starting capital for each bot before increasing to \$10,000 per model, with trades executed on decentralized exchange Hyperliquid.

For Solv Protocol, the deal marks one of the largest public-market integrations for its wrapped Bitcoin product to date, though the move also limits participation to qualified investors and may dilute existing shareholders.
