Comprehensive Guide to binance spot margin

Don't rely on sentiment alone. Use onchain analytics to detect large transfers to exchanges or deposits from smart contracts tied to token unlocks. If Grok reports "large inflows to Binance in the last 24 hours," for example, it can indicate increased sell-side risk.

1 ZH/s means that per second, the computers securing the Bitcoin network are doing one sextillion (1,000,000,000,000,000,000) hashes every second—an absurdly large number.

In March 2025, the exchange began moving assets between its wallets, a likely step in preparing for further repayments ahead of the Halloween deadline.

The FT estimated that World Liberty Financial generated more than \$550 million in sales of its WLFI token, which included investments from Chinese crypto billionaire Justin Sun and the United Arab Emirates-based crypto fund Aqua 1 Foundation.

It also means there is more mining activity on the network as miners expand their operations and use more machines—and power—to continue minting coins.

Around two-thirds of institutional investors have a positive outlook for Bitcoin going into 2026, according to Coinbase.
