Comprehensive Guide to binance spot take profit

While some market observers believe that the traditional crypto four-year cycle is about to be broken, analysts told Decrypt this week that they believe some traders are still following the classic rulebook—and selling due to the expectation of falling prices ahead.

Experts highlight a stark divergence between Ethereum's bearish options activity and bullish institutional inflows.

The company's current offerings include the Daily Target 2X Long MSTR ETF (MSTX) and Daily Target 2X Long HOOD (HOOX), which seek results that are two

times the daily share price change of Strategy and Robinhood.

Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what businesses need: trust, functionality and speed.

The cycle repeats in the early 2020s, with an examination of a lesser-known hack of Indexed Finance. The exploit was allegedly perpetrated by an attacker alternatively named Umbril Upsilon and Zeta Zeros, who would eventually be identified as the teenager Andean Medjedovic.

Bitcoin was recently trading for \$110,368, up 1.6% over the past 24 hours, although the coin was off 3.6% over the past week, according to crypto markets data provider CoinGecko. The largest digital asset by market value last week dropped as low as \$104,778.
