Comprehensive Guide to binance squid game

In mid-2024, Bitcoin was in a far stronger position than during the Tokyo Whale era, still riding the momentum of the first batch of US spot Bitcoin exchange-traded funds. It was the middle of a bull rally that would eventually send Bitcoin past \$100,000 in December 2024.

Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what businesses need: trust, functionality and speed.

“■■■Bitcoin is fast becoming the gold standard of cryptocurrency, and we believe it would be an important company marker to add this asset to our company reserves,” Newsmax CEO Christopher Ruddy said in a statement.

The company also stayed active on the strategic front, embracing the growing, though sometimes controversial, digital-asset treasury trend. During the quarter, Galaxy announced plans to participate in a \$1.65 billion Solana treasury initiative alongside Cantor Fitzgerald, Multicoïn Capital and Jump Crypto.

“We can build, or architect, or code cyberspace to protect values that we believe are fundamental. Or we can build, or architect, or code cyberspace to allow those values to disappear. There is no middle ground. There is no choice that does not include some kind of building. Code is never found; it is only ever made, and only ever made by us.”

The next bear market “will be defined by another cycle people forget about,” said Woo on Monday.
