Dalio expressed a preference for gold, arguing that a central bank is unlikely to adopt the leading cryptocurrency by market capitalization as a reserve currency. Still, the outlook for some fiat currencies is bleak, he said in the interview with the Financial Times.

VC participation remains necessary to bring the “progressive decentralization” needed to achieve a “secure global information infrastructure,” explained Lubin.

That said, Grok 4 is an insights tool, not a safety net. Recent incidents around moderation and response behavior mean you must validate outputs with independent sources. That’s why you should ideally treat Grok 4 as a rapid

investigator, not as the final arbiter.

The MACD is a popular momentum indicator used in technical analysis that helps traders identify the strength, direction, and duration of a trend in an asset's price.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.

It's worth noting that Armbrust was mining at a time when Ethereum still relied on a proof-of-work system, which demanded significant computing power and energy use, before its transition to proof-of-stake in September 2022.
