It will also add dynamic risk configurations, which reduce liquidation risks across multi-asset portfolios.

The proposed legislation, known as the STREAMLINE Act, would raise the Bank Secrecy Act's reporting thresholds for the first time since its creation more than 50 years ago.

"At this point, it's too early to tell whether the demand for HPC will meet lofty expectations," he wrote. "We remain focused on infrastructure that keeps bitcoin mining competitive, helping clients secure power-ready sites, interconnection, and long-duration energy, with the flexibility to repurpose assets for HPC if and when

demand matures."

The difference between the crypto trading performance of the AI models likely stems from their training data, according to Nicolai Sondergaard, research analyst at crypto intelligence platform Nansen.

Price pushes through a well-watched level on weak or average volume, shows little follow-through, and the next candle closes back inside the prior range.

With Grok 4, you can automate the first round of filtering — for example, summarizing white papers, spotting tokenomics red flags and checking liquidity. By the time you get to manual research, you are already down to the 10% of projects that actually deserve your attention.
