Comprehensive Guide to binance withdraw suspended

WBTC requires trust because the Bitcoin backing it is held by a centralized custodian who must be trusted not to lose, freeze, or misuse the funds. Users depend on this custodian's honesty and solvency rather than cryptographic guarantees. This is the primary issue addressed by Babylon's trustless implementation.

However, he emphasized that it is still a "working theory" and that he remains a Bitcoin bull.

“These protections have already proven to be successful in addressing other types of non-consensual imagery, and we've now built the same capabilities for fake explicit images as well,” Google said. “These efforts are designed to give people added peace of mind, especially if they’re concerned about similar content about them popping up in the future.”
