When it comes to crypto investing, such an attitude could translate into a “readiness to engage with new and unconventional assets,” he added.

As the first successful application of blockchain technology, cryptocurrencies have gone through more than ten years of development. From the initial Bitcoin to the current wide variety of tokens, the cryptocurrency market has experienced multiple booms and busts. Nevertheless, the ideas of decentralization and disintermediation represented by cryptocurrencies are profoundly influencing the traditional financial system. More and more institutional investors are beginning to pay attention to and participate in the cryptocurrency market, and governments of various countries are also actively exploring regulatory frameworks for

cryptocurrencies to promote their healthy development.

Huobi founder Li Lin wants some of that alpha and has reportedly raised about \$1 billion as part of a strategy to invest in an Ether treasury.

According to the Director of Global Macro at Fidelity, Jurrien Timmer, the recent pullback resembled the late-1990s “super bull” phase, when speculative assets saw sharp but temporary drawdowns before surging higher again.
