Chainalysis attributed Russia's surge in crypto adoption to two primary factors: a spike in large institutional transfers and the growing use of decentralized finance (DeFi).

Unlike a company's stock market cap, which is based on outstanding shares, the market cap of gold is a calculation of the total value of all the gold that has ever been mined; however, it is impossible to know the exact amount.

"I think that most fiat currencies, especially those with large debts, will have problems being effective storeholds of wealth and will go down in value relative to

hard currencies,” he said, pointing to parallels between the coming years and two periods in the 20th century.

Participation confirming: Look for above-average volume and improving breadth. Weak follow-through means higher trap risk.
