Regulatory developments are also helping to drive adoption. In the United States, the recently passed GENIUS Act establishes clearer oversight and reserve requirements for issuers, aiming to ensure transparency and consumer protection. In the United Kingdom, where legislation has progressed more slowly, regulators are working toward introducing a stablecoin framework by the end of next year.

In 2025, crypto remains a mix of opportunity and challenge. Prices continue to fluctuate as fresh regulations, new tech and AI trends influence how the market moves.

"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

A Financial Times investigation found that President Trump and his family's crypto businesses have profited \$1 billion pre-tax. When asked if the calculations were accurate, Eric Trump told the publication that the true figure was "probably more."

Market adoption poses another challenge. It needs to be seen how staking-enabled ETPs perform when competing with Ether ETFs.
