“What that means is that when you remove a result from search under our policies, in addition, what we'll do is on any query that includes your name—or would be likely to surface that page from search—all explicit results will be filtered,” the spokesperson said. “So not all explicit results will be removed, but all explicit results will be filtered on those searches, which prevents them from appearing on searches where it would be likely to show up.”

The fund was on track to hit \$100 billion in assets under management and become the youngest ETF to cross that milestone, but last week's market crash derailed the timeline.

The product features institutional-grade security protocols, with Coinbase transferring Bitcoin from trading wallets into segregated, offline cold storage by day's end.

The company also stayed active on the strategic front, embracing the growing, though sometimes controversial, digital-asset treasury trend. During the quarter, Galaxy announced plans to participate in a \$1.65 billion Solana treasury initiative alongside Cantor Fitzgerald, Multicoine Capital and Jump Crypto.
