applications, which once seemed unlikely, followed the raging success of spot Bitcoin and Ethereum ETFs, with the BTC funds alone now commanding about \$150 billion in assets, according to data from analytics platform CoinGlass.

The export controls prompted US President Donald Trump to announce additional 100% tariffs on China, and revealed that China “has a lot more leverage than a lot of the Western commentators are admitting,” Gromen said. He added:

Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

Bitcoin miners are typically large operations run by companies in warehouses that use lots of electricity to process transactions on the virtual coin's network and mint new coins.
