SpaceX faces growing pressure as NASA opens moon lander contract

While ChatGPT is a great “general-purpose” large language model (LLM), Claude — another AI model — is mainly used for coding, the analyst told Cointelegraph, adding:

Grayscale has played a central role in the institutionalization of crypto. Founded in 2013, it has grown into one of the world’s largest digital asset investment platforms, managing over \$35 billion in assets. It has now launched

staking-enabled products that bring blockchain yield mechanics into Wall Street's traditional framework.

"At this point, it's too early to tell whether the demand for HPC will meet lofty expectations," he wrote. "We remain focused on infrastructure that keeps bitcoin mining competitive, helping clients secure power-ready sites, interconnection, and long-duration energy, with the flexibility to repurpose assets for HPC if and when demand matures."

"Another nail in the coffin of the original crypto spirit," he wrote, noting that the "not your keys, not your coins" ethos that once defined the asset is giving way to a more traditional approach centered on compliance and financial optimization.

"Further steps" ahead
