Decentralized applications (DApps) are changing the way we interact with the Internet. Unlike traditional applications, DApps run on blockchain networks, do not rely on centralized servers, and feature decentralization, openness, and immutability. Currently, DApps are mainly concentrated in games, finance, social media, and other fields, providing users with brand new experiences. Although the development of DApps still faces challenges such as user experience, performance, and scalability, with the continuous advancement of technology, we believe that DApps will become an important part of the future Internet.
