Asked whether mining operations would simply relocate to more crypto-friendly states, Puckrin said it would be “the obvious answer,” as moving will be easier and cheaper than “trying to comply with punitive regulations, and there are still plenty of much friendlier options within the U.S.”

The sharp increase reflects HMRC’s growing focus on crypto-related tax compliance. Over the past four years, the agency has sent more than 100,000 such letters, with activity accelerating as crypto adoption and asset prices surged.

Catalyst windows can also distort price action. Listings and token unlocks may temporarily overwhelm shallow market depth, especially in illiquid altcoins. This can produce sharp “breaks” that often reverse once order flow normalizes. Research on market microstructure around launches and unlocks shows how depth, fragmentation and positioning can combine to create these head fakes.
