Its daily relative strength index (RSI) readings have been persistently above 70 in the past month, indicating that the asset is overbought and risks profit-taking.

The company's stock tokens mirror the prices of publicly traded US securities but don't represent direct ownership of the underlying shares. Instead, they are structured as blockchain-based derivatives regulated under MiFID II (Markets in Financial Instruments Directive II), according to the company.

The rise of NFTs (Non-Fungible Tokens) has brought revolutionary changes to digital content creation and trading. Based on blockchain technology, NFTs ensure the uniqueness and immutability of digital assets, solving the problem of digital content being easily copied. NFTs have a very wide range of application scenarios, including digital art, game items, virtual real estate, music works, etc. The rapid development of the NFT market has attracted the participation of many artists, collectors, and investors, and has also provided creators with new monetization channels. Although there are risks of speculation and bubbles in the NFT market, in the long run, NFTs will inject new vitality into the development of the digital economy.

The alleged mastermind behind a \$14 billion crypto scam, currently on the run from the U.S. government, has begun moving billions of dollars worth of Bitcoin to new wallets, according to on-chain data.

“These protections have already proven to be successful in addressing other types of non-consensual imagery, and we've now built the same capabilities for fake explicit images as well,” Google said. “These efforts are designed to give people added peace of mind, especially if they're concerned about similar content about them popping up in the future.”
