Researchers at tech giant Google said they mapped out the structure of a molecule 13,000 times faster than the most powerful “supercomputers” available today, achieving the first verifiable quantum advantage.

Grayscale’s staking-enabled ETPs have had a significant impact on Wall Street and the broader crypto ecosystem. It connects blockchain-based yield with regulated financial products, turning crypto ETPs from simple price trackers into income-generating assets. The initiative marks a key advance in institutional adoption. Regulated staking on Ethereum and Solana could draw substantial new capital to these networks while acting as a model for products linked to other PoS blockchains or tokenized assets.
