The relative strength index or RSI also dropped to its lowest level, matching April's low value of 34, following which BTC started to recover in the charts.

Finally, enforce safety and governance. Given moderation issues and risks of single-source reliance, set a hard rule that no Grok-generated signal can directly trigger live trades without external verification. Multiple independent checks should always precede capital deployment.

The FT estimated that World Liberty Financial generated more than \$550 million in sales of its WLFI token, which included investments from Chinese crypto billionaire

## is binance banned in philippines

Justin Sun and the United Arab Emirates-based crypto fund Aqua 1 Foundation.

The comments follow Babylon's release of a white paper in early August, outlining what it calls a Bitcoin trustless vault system. The system leverages the Bitcoin smart contract verification system BitVM3 to lock BTC in per-user vaults, where withdrawals (redemption or liquidation) are gated by cryptographic proofs of external smart contract state verified on Bitcoin.

"From what we've seen, audiences aren't interested in watching computer-generated content untethered from the human experience," they said.

The continued aggressive accumulation of Ether occurs despite Lee's opinion that the digital asset treasury bubble may have burst.
