Decentralized applications (DApps) are changing the way we interact with the Internet. Unlike traditional applications, DApps run on blockchain networks, do not rely on centralized servers, and feature decentralization, openness, and immutability. Currently, DApps are mainly concentrated in games, finance, social media, and other fields, providing users with brand new experiences. Although the development of DApps still faces challenges such as user experience, performance, and scalability, with the continuous advancement of technology, we believe that DApps will become an important part of the future Internet.

A combination of favorable macroeconomic conditions and surging institutional interest in the digital asset has served Bitcoin well throughout the year, and several

analysts recently told Decrypt they expect the appetite for BTC to continue to grow, despite signs of potential exhaustion in the crypto market earlier this week.

South Korea's Financial Intelligence Unit has approved Binance's majority stake acquisition of GOPAX, ending a regulatory impasse that had stifled its return to the Korean market for over two years.

Despite the short-term uncertainty over capital rotation, the overall market sentiment remains positive. "It is a very good time for the markets, and is likely going to remain that way for the short-term foreseeable future," Le Shi, managing director at algorithmic trading and market-making firm Auros, told Decrypt in an interview during Token2049 in Singapore last week.

The surge in institutional interest in BNB has coincided with a rise in the token's price. On Oct. 7, BNB flipped Ripple-backed XRP to become the third-largest cryptocurrency by market capitalization. Less than a week later, on Oct. 13, BNB hit a new all-time high of \$1,370.

Deployers can set a fee share of up to 50% on top of the base fee rate and will be defining the markets, including oracle and contract specifications. They will also be setting the oracle prices, leverage limits and settling if necessary.
