According to the Director of Global Macro at Fidelity, Jurrien Timmer, the recent pullback resembled the late-1990s “super bull” phase, when speculative assets saw sharp but temporary drawdowns before surging higher again.

The 2001 business cycle downturn, also known as the “dot-com bubble,” saw increasing unemployment and a 50% fall in the US stock markets (S&P; 500) over two years. It was triggered by the collapse of overvalued tech companies and excessive speculation.

In March 2025, the exchange began moving assets between its wallets, a likely step in preparing for further repayments ahead of the Halloween deadline.

Coinbase says the high compliance costs pose "formidable barriers to entry for smaller financial service providers, including fintech startups," and are often passed on to customers through higher banking fees and denial of financial services, particularly affecting low-income customers.

Bitcoin and gold have surged this year. The precious metal's price has increased 38% year-to-date, hitting an all-time high of \$3,530 per ounce Wednesday, according to Trading Economics. Bitcoin's price has increased 20% to \$112,000 over the same period, according to crypto data provider CoinGecko.

The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.
