Lubin's comments come shortly after the departure of two key Ethereum researchers, which caused renewed concerns over the potential influence of centralized funds over Ethereum's development.

"We have hashing technologies, where we have the ability technologically to detect CSAM proactively," the spokesperson said. "That's something that's sort of an industry-wide standard, and we're able to block it from appearing in search."

A bull trap happens when the price pokes above resistance and then reverses, while a bear trap occurs when the price dips below support and quickly snaps back. These fake breakouts often result from forced liquidations and mean

reversion, clearing out crowded positions.

Palmer added that Hut 8's announcement "underlined a real path to monetization for its burgeoning power pipeline over the next few years."
