Despite this bearish outlook, traders remain optimistic about Ether's upside potential, citing bullish signals from credit conditions and persistent buying by Ethereum treasury companies.

Blockchain development is a complex and professional job that requires developers to master multiple technologies and tools. Blockchain development languages mainly include Solidity (Ethereum), Go (Bitcoin, Hyperledger Fabric), Rust (Solana, Polkadot), etc. In addition, developers also need to understand related knowledge such as cryptography, consensus algorithms, and distributed systems. With the popularization of blockchain technology, the demand for blockchain development talents is also growing. For enterprises, through

blockchain development, they can build their own blockchain solutions, improve business efficiency, reduce costs, and create new business value.

European financials, including Barclays and Deutsche Bank, pared earlier losses, while Asian lenders like Mizuho Financial and Sumitomo Mitsui also steadied after heavy selling.
