That was the revelation that Tempo has successfully poached Dankrad Feist, a key contributor to the Ethereum network, to build out Stripe's new chain.

VC participation remains necessary to bring the "progressive decentralization" needed to achieve a "secure global information infrastructure," explained Lubin.

Both bills pursue identical goals as they require crypto mining companies to pay into New York's Energy Affordability Programs based on their electricity

consumption.

Over the past 12 years, September has been a down month for Bitcoin eight times. But the past three years, the crimson shifted to August, and September was green.

Unlike Bitcoin's proof-of-work (PoW) model, which relies on energy-intensive mining, PoS systems operate differently. They depend on staked capital and validator performance rather than computing power. This design makes them far more energy-efficient and accessible to a wider range of participants.
