to help secure and validate transactions on proof-of-stake (PoS) blockchains. In return, participants earn rewards — similar in concept to earning interest — for supporting network operations.

Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software

wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.

This will allow customizable lending markets while pooling liquidity through “hubs,” improving efficiency and scalability.

“If we get a biz cycle downtown, like 2001 or 2008, it will test how BTC trades. Will it drop like tech stocks or will it drop like gold?”

“We are competing with China, so we need the best company to let us land on the moon as soon as possible. SpaceX has won a contract to build HLS, but the progress is slow,” said Duffy in a CNBC interview on Monday.

Decentralization concerns are also significant. Institutional staking may enhance validator control, granting large funds outsized influence over governance and network security of the underlying blockchains. This would be against the core principles of decentralization.
