Russia's received crypto volumes have increased 48% from last year's \$256.5 billion, widening its lead over major economies such as the UK, which recorded \$273.2 billion in the past year, about 30% less.

The difference between the crypto trading performance of the AI models likely stems from their training data, according to Nicolai Sondergaard, research analyst at crypto intelligence platform Nansen.

This isn't a zero-sum fight between corporate and permissionless chains. They'll likely complement each other. Corporate L1s will handle the compliant, large-volume flows that bring in conservative capital, while permissionless chains

will keep pushing the boundaries, generating the innovation that the corporations will eventually adopt.

Grok 4 and DeepSeek were the two best-performing generative AI chatbots in a crypto trading competition launched by developers that received viral attention.
