“Dollar dominance is going to be the opportunity of Ethereum,” he said, adding this will be because of “everything becoming...tokenized.”

Liquidation cascades: Leveraged positions are automatically closed when margin runs short. When price hits clustered stop or liquidation levels, forced selling or buying accelerates the move. It often snaps back once excess leverage is cleared. That snapback leaves the classic bull or bear trap footprint seen repeatedly in Bitcoin

These are the advocates now of a code-is-law ethos, those who think freedom from restraint will advantage them precisely because it is asymmetric. They disproportionately wish to pursue activities that society censures, so a less powerful social conscience disproportionately benefits them.

“When corporations gain too much legibility and influence over open source projects, priorities start to drift away from the community’s long-term vision and toward corporate incentives. That’s how misalignment begins.”
