Daily active addresses on BNB Chain hit an all-time high on Monday, as the network's native crypto token reached a new price record.

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

While ChatGPT is a great “general-purpose” large language model (LLM), Claude — another AI model — is mainly used for coding, the analyst told Cointelegraph, adding:

When the usage moves beyond consumer transactions into payments infrastructure, institutional use, remittances and treasury operations, different strengths of BTC, ETH and XRP become more visible.
