The stablecoin has been criticized by the European Union for being used as a tool for sanction evasion by Russia. The US government has also linked A7A5 to Grinex, the successor of Garantex, which was allegedly involved in money laundering and ransomware attacks with \$100 million in transactions related to illicit activities.

mining company by market capitalization, announced a new strategy to expand into AI data center infrastructure, aiming to diversify its revenue streams and strengthen long-term cash flow potential.

Even with co-signing meant to curb censorship, the model still assumes enough liquidators (and sometimes large lenders) behave correctly. Even if they cannot steal Bitcoin thanks to the system's design, this introduces a trust assumption into the system.

While we abstract it away in our discussions, this final step, the violence, is the basic quantum of all regulation. And as long as governments have armies, and developers and hackers do not, those who believe code is law will be unable to enforce their priors on the rest of us.

The rise of NFTs (Non-Fungible Tokens) has brought revolutionary changes to digital content creation and trading. Based on blockchain technology, NFTs ensure the uniqueness and immutability of digital assets, solving the problem of digital content being easily copied. NFTs have a very wide range of application scenarios, including digital art, game items, virtual real estate, music works, etc. The rapid development of the NFT market has attracted the participation of many artists, collectors, and investors, and has also provided creators with new monetization channels. Although there are risks of speculation and bubbles in the NFT market, in the long run, NFTs will inject new vitality into the development of the digital economy.

This measure is a companion to the S8518 Bill, introduced earlier this month by State Senator Liz Krueger, Chair of the Senate Finance Committee, in the New York State Senate.
