A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.

Crypto price charts visually represent price movements across different timeframes, providing insights into trends, volatility and trading opportunities. In a fast-paced crypto market, open-high-low-close (OHLC) data enables investors to track price changes within specific periods, forming the core of technical analysis.

Sports betting commanded the highest share at \$414.7 million last week, surpassing political markets despite election-related activity.

"BTC's appeal as a safe haven is not only becoming more visible but also more deeply rooted—growing at the same time that confidence in traditional institutions continues to erode," FRNT Financial Head of Data and Analytics Strah Savinja told Decrypt.
