That doesn't make it hopeless for permissionless builders, but it does change the game. Competing head-to-head on the same vectors (licensing, institutional distribution) is suicide. The opportunity is what the corporate L1s won't or can't do.

Uniswap added support for the Solana network to its web app, allowing Solana users to link their wallet and trade Solana-based tokens alongside those from other networks.

Among major layer-1 tokens, he singled out Solana for its standout potential. "Solana remains one of the most interesting assets among major altcoins," Verbitskii noted, citing its strong fundamentals. "If the current market momentum holds, a move toward the \$300 to \$400 range by year-end looks realistic."

Monday alone saw Ether ETFs shed \$145.7 million, bringing total net outflows over the past eight days to \$640.5 million.
