Google global search interest for the term “Bitcoin” dropped to 19 last week, coinciding with Bitcoin’s flash crash on Friday, according to Google Trends.

Kobayashi’s Feb. 6 sale also coincided with Bitcoin’s slide to around $6,000, which was the lowest point of that year’s first quarter. Bitcoin was already falling from its December 2017 peak of nearly $20,000 during the height of the initial coin offering (ICO) boom.

The financing combined $15.3 million in cash and stablecoins with $11.7 million in OBNB Trust units, giving the company indirect ownership of roughly 10,647 BNB.

The BNB-linked warrants remain subject to shareholder approval before the tokens can be formally transferred.

This conservative approach effectively took it out of the running for major gains, but also protected it from the significant downturns experienced by some of its rivals, positioning it as a more stable, if unprofitable, participant. Meanwhile, Claude Sonnet was comfortably in third place among the six contenders.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

China’s rare earth mineral export controls prohibit the sale of the critical minerals to the US military industrial complex, which backs the value of the dollar through military force, Gromen told Marty Bent, founder of Truth For the Commoner (TFTC), on Sunday.
