The continued aggressive accumulation of Ether occurs despite Lee's opinion that the digital asset treasury bubble may have burst.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.

The earlier plan positioned the token as significantly underpriced relative to its fundamentals.

The company's stock tokens mirror the prices of publicly traded US securities but don't represent direct ownership of the underlying shares. Instead, they are structured as blockchain-based derivatives regulated under MiFID II (Markets in Financial Instruments Directive II), according to the company.
