Google's newly released AI-powered search results are garnering lots of attention—for the wrong reasons. After the tech behemoth announced a host of new AI-powered tools last week as part of a new “Gemini Era,” its trademark web search results changed significantly, with natural language answers to questions displayed above websites. “In the past year, we’ve answered billions of queries as part of the search-generated experience,” Google CEO Sundar Pichai told the audience. “People are using it...

Offering tokenized stocks has become a point of focus for many U.S.-based crypto companies. Crypto exchange Coinbase has said it wants to tokenize stocks since before its IPO and recently renewed the push. Trading platform Robinhood made waves in early July when its tokenized stock offerings included private companies—namely OpenAI and SpaceX.

The US dollar is on track for its worst year since 1973, amid Bitcoin and gold hitting new all-time highs, according to investment analysts at The Kobeissi Letter.

While AI tools can help spot market trend shifts for day traders via social media and technical signals, traders still can't rely on them for autonomous trading.

How trustless is it?

Bitcoin dropped below \$108,000 per coin in September as the biggest digital coin started "showing signs of exhaustion," according to Glassnode analysts, as long-term holders took profits and ETF flows slowed down.
