Kraken attributes the shift to the country being “more densely populated with professional traders than other regions” it operates in.

Dalio said cryptocurrencies resemble hard currencies, partly due to their so-called tokenomics. Bitcoin’s total supply, for example, is capped at 21 million, while the government can theoretically print an unlimited amount of money.

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.
