Uniswap adds Solana support on web app in \$140 billion opportunity

Japan's new Prime Minister, Sanae Takaichi, announced a package of economic stimulus measures on Tuesday to ease the impact of inflation on households. The move, some crypto observers said, may drive more capital into Bitcoin.

That state of affairs could now change imminently. Waller's plan would allow U.S. institutions focused on "payments innovation"—aka, crypto and other emerging financial technologies—to gain their own access to the Fed's services, as opposed to depending on third-party, master account-holding banks.

Meanwhile, Vincent Liu, chief investment officer at Kronos Research, told Cointelegraph that the persistent ETF outflows reflect a broader de-risking phase. “Investors are locking in profits and sidelining fresh capital; both ETFs are seeing reduced risk appetite and thinner bid depth across the board.”

Part of this growth is being driven by improvements in underlying blockchain infrastructure, with some networks now processing over 3,400 transactions per second, a more than 100-fold increase in throughput over the past five years.

“It’s not exactly clear what happened, but somehow the president of Argentina was promoting this shitcoin, and Hayden was involved,” he said. “I was really inspired by that.”
