In fact, even with such a sharp correction, the overall trend could still be considered long-term bullish, with prices still trading above the 50-day EMA.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance.

However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.

Just this week, the Michael Saylor-helmed business intelligence firm spent another \$27 million on Bitcoin, shortly before it crashed to current prices, now changing hands at around \$111,500.

Community split on future of corporate blockchains

A Newsmax spokesperson told Decrypt that the purchases will be made from its capital funds, and that the company was inspired by other movers in the treasury space.

Since its debut, the group has focused on shock value and provocation to market the token.
