This guide shows how to read those signals (and wait for confirmation) before putting capital at risk.

HMRC's visibility into the market has improved dramatically. The agency now receives transaction data directly from major crypto exchanges and will gain automatic access to global exchange data from 2026 under the Organisation for Economic Co-operation and Development (OECD)'s Crypto-Assets Reporting Framework (CARF).

The category, which includes assets like Solana, Avalanche, BNB, Sui, and Aptos, posted a 12.54% gain from September 29th to October 5th, according to Velo data.

The layer-2 sector was the closest competitor, rising 11.32% over the same period, while other niches, such as meme coins, DeFi, gaming, and AI, saw more modest returns of around 5% or less.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.
