Meanwhile, Jim Harper, a non-resident Senior Fellow with the public policy think tank the American Enterprise Institute, had a different approach.

"The short-term trend—that began with the big liquidation event earlier this month—is down and traders might want to test the technical support in the \$100,000 and \$3,800 levels for BTC and ETH several times before there's either a sustainable rebound or a sharper move lower," he said.

App-specific layer-1 chains that must build out their own validator set suffer from centralization issues and could face increased legal liability, Mehta said.

"We're testing SearchGPT, a prototype of new search features designed to combine the strength of our AI models with information from the web to give you fast and timely answers with clear and relevant sources," OpenAI said in an official blog post.

At the start of the year, there were about \$205 billion worth of stablecoins in circulation, according to data aggregator DeFi Llama. Within the past week, the total market cap for stablecoins has surpassed \$302 billion. That kind of rapid growth will need to accelerate in the coming years to fulfill Standard Chartered's projections.

Coinbase says the high compliance costs pose "formidable barriers to entry for smaller financial service providers, including fintech startups," and are often passed on to customers through higher banking fees and denial of financial services, particularly affecting low-income customers.
